Gas hob connector /Adapter

Pegler Prestex series 41 straight coupling 15mm copper to 1/2" Iron is the correct adaptor. Pegler technical support have confirmed that this is the correct fitting for gas.

concerned that the "male" iron thread that connects to the copper "female" was shorter than the previous fitting that Smeg supplied. This isn't an issue as the thread on the Prestex fitting can overrun the end of the "smeg" fitting thus, with the correct jointing paste and fibre washer will provide a perfect, leak free seal.

The Prestex fittings are £1.80 inc vat PTS in Haywards heath stock them as do all leading plumbing merchants. I've attached a picture of the "Smeg" fitting with the Prestex one for your information. The site to view is <http://www.pegler.co.uk> Any more queries please call
