

FOR INFORMATION ONLY

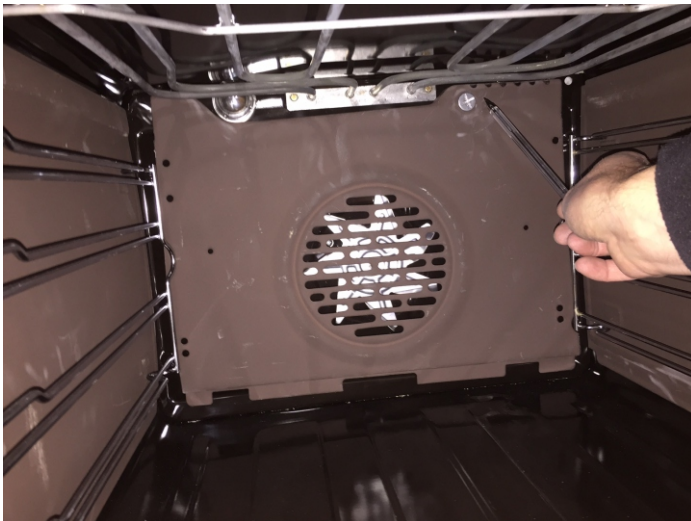

DO4SS-5 Rear Element Replacement

ALWAYS ISOLATE THE APPLIANCE AT THE MAINS BEFORE STARTING THE REPAIR

The below 2 photos show the two versions of the rear oven cover which has to be removed to gain access to the circular fan element.

The cover is fixed by two screws on each side on the newer version, however the older version requires the chrome nut to be removed.

Please remember to isolate the appliance from the electrical mains supply before attempting to remove this cover.
