

Smeg philosophy

Distinctive domestic appliances developed in collaboration with leading architects of the world. Products that express "Made in Italy" style by perfectly combining design, performance, and attention to detail. Smeg. Technology with style.

OVERVIEW	2
50'S RETRO STYLE	6
ST/STEEL	18
SIDE BY SIDE	21
CHARTS AND FUNCTIONS	22

Smeg was established in 1948 as an enamelling plant, working with metals; the acronym of Smeg (Smalterie Metallurgiche Emiliane Guastalla) serves as a memory of the initial activity carried out by the Company.

FREESTANDING FRIDGES, EXUDING STYLE

All Smeg free standing fridges are designed to enhance the environment they inhabit. Their lines, colours and materials blend beautifully with other furniture, lending a touch of style and prestige. The wide choice of different materials and colour effects can meet all sorts of tastes and bring originality and personality to any space.

GIVE PERSONALITY TO THE KITCHEN

Smeg fridges are more than just a commodity, freestanding refrigeration models are available in a **vast range of styles**, from contemporary stainless steel to bold retro aesthetics. They make a statement in any kitchen or perfectly complete a modern minimal design. Distinctive "Classic" style handles on some models coordinate well with many other "Classic" Smeg products.

ST/STEEL EFFECT

St/steel effect refrigerators have been added to the range which all have a flat door creating clean lines and an understated design. One of these, the FC34XPNF, also features a handle-less door design, further enhancing the simplicity and sleekness of these products.

SIDE-BY-SIDE

Smeg offers an American-style **side-by-side** fridge whose versatile dimensions are combined with the sort of elegance that is so typical of Italian design.

50'S RETRO STYLING

Beautiful bold finishes and soft round curves reminiscent of 1950's retro design, there are many colour options to choose from in the iconic Smeg FAB range from stylish white to vibrant red.

NEW FAB10 HOME BAR, THE ULTIMATE IN DRINKS STORAGE

New to the iconic FAB range is the FAB10 Home Bar. Developed by an intuition that goes beyond the traditional concept of a mini-fridge, the Home Bar has an innovative interior that maximises storage space within the appliance. The internal space is so flexible. There is specific housing for bottles, which can be placed either vertically or horizontally and there are shelves dedicated to housing cans, ensuring perfect placement of each type of drink. Available in a choice of three colours; Red, Cream or Black, which can add a splash of colour to your kitchen and create a cool and contemporary look.

SUPERB CRAFTSMANSHIP

Over the years Smeg have accumulated solid know-how and expertise to produce innovative appliances both in terms of design and technology. The interiors are designed to allow full use of the space available, and include numerous internal storage compartments, such as chiller sections and ice dispensers.

ADVANCED TECHNOLOGY

Features and performance

This compartment is ideal for keeping fish, meat, dairy products and other highly perishable foods fresh. The extra fresh compartment maintains a constant temperature between just above 0°C and +5°C, keeping the food fresher for longer.

AIR PLUS which keeps food fresher for longer. A fan in the refrigerator distributes cool air through vents to provide even cooling throughout the refrigerator, and returns the temperature to its optimum level quickly after the door has been opened.

The **Frost-free** refrigeration system ensures dry conditions by forced air circulation throughout the interior, moving between the freezer and refrigerator and preventing ice from forming on the sides. The flow of air can allow extra cool compartments in the refrigerator, useful for storing perishable items longer than usual.

In **No Frost** appliances forced air is circulated through the fridge and freezer sections separately using 2 evaporators, preventing ice forming on the sides. No Frost products have the most energy efficient frost prevention system where energy is not wasted unnecessarily, so they are more cost effective and efficient to run through the lifetime of the appliance.

The **FAST FREEZING** option is particularly useful when you want to freeze a large quantity of fresh food. Activating the fast freeze function a couple of hours before introducing the fresh food means that the freezer gets ready to work on full power, bringing the temperature right down.

The **AUTOMATIC DEFROST** system is a time saving device that works by automatically defrosting at regular intervals eradicating the need to defrost altogether.

Some refrigerators feature **LED INTERIOR LIGHTING** which illuminates the interior of the appliance. LED lighting is more energy efficient and lasts longer than traditional bulbs.

The **POWER SAVING MODE** is particularly useful in cases of prolonged absence from home such as holidays, as it allows you to disable the refrigerator and keep the freezer working which saves electricity.

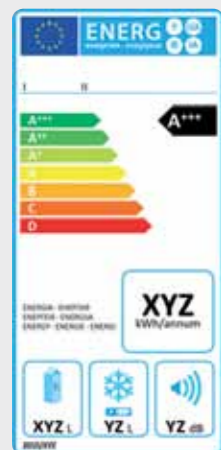

Excellent insulation and special devices, specifically designed to muffle the sound generated during operation, keeps the noise to a minimum for maximum comfort in the environment.

Respect for the Environment

All Smeg refrigerators and freezers have at least an A+ energy rating. The major drive for innovation has made it possible for some models to achieve even greater energy efficiency, with an A++ rating. Ever sensitive to the need to safeguard the environment, Smeg has been offering highly reliable models for many years that are completely free of CFCs and HFCs, the gasses responsible for the hole in the ozone layer.

EXPLAINING THE EU ENERGY LABEL

The new EU energy label provides consumers with accurate, recognisable and comparable information on domestic household products regarding energy consumption, performance and other essential characteristics. EU energy labels provide all the essential product information, particularly energy consumption, to enable consumers to compare products before purchase.

The revised labels now include:

- Energy rating from A+++ to D
- Annual energy consumption in kWh
- Capacity of all storage compartments in litres
- Capacity of frozen food storage compartments in litres
- Noise emissions in decibels

Revised European legislation introduced energy ratings up to A+++ to further differentiate between already energy efficient models and those incorporating the latest technological developments. For more information please visit www.newenergylabel.com.

SIDE-BY-SIDE: AMPLE SPACE

The American style side-by-side refrigerator-freezer offers a number of special features: an ice and water dispenser integrated elegantly into the door has been designed so that as much space as possible remains inside the freezer compartment. A modern LCD display makes it possible to adjust the functions selected and regulate the interior temperature settings without opening the door. This has a significant energy saving and a lower cooling loss.

EXTENDING THE REFRIGERATION SPACE

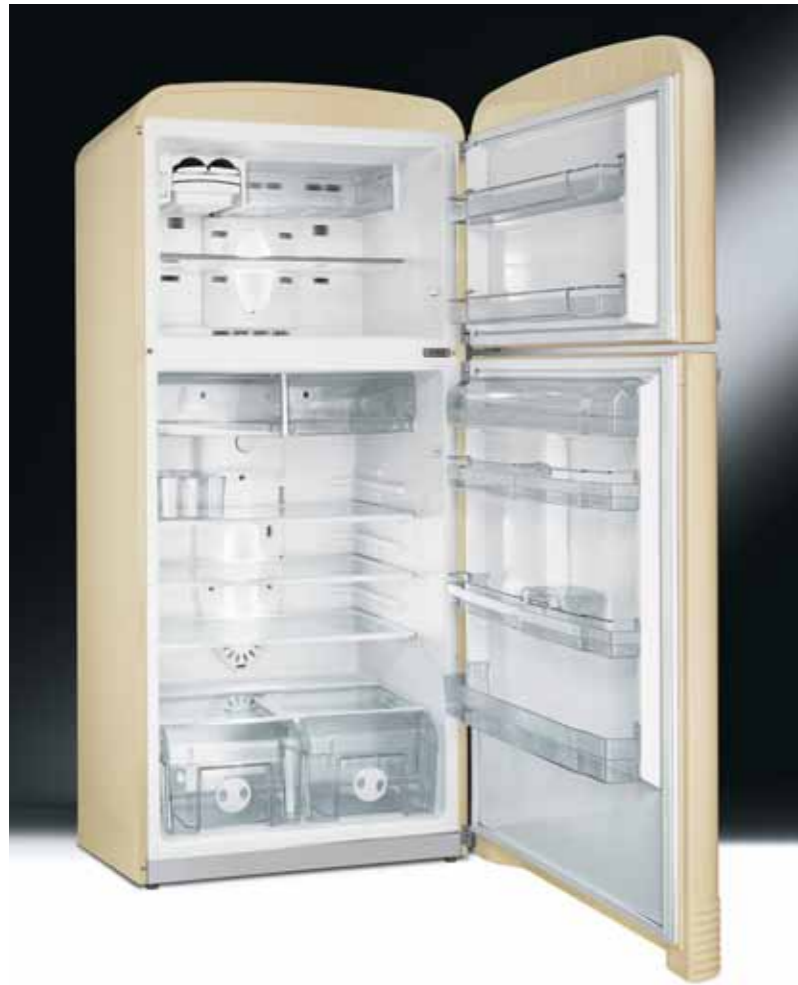

New to the Smeg freestanding refrigeration range are the UK26PXNF3 and UK35PX3. These appliances can be positioned side by side in order to create a large refrigeration space that maximises food storage capabilities.

The Freezer is also No Frost which means it does not require defrosting, a very handy feature.

A number of FAB28's and CVB20's (in Cream, Red, Orange and Black) can also be positioned next to each other to create the same effect.

Gross capacity: 484 litres
 1 compressor
 2 adjustable thermostats
 Noise level: 43 dB(A) RE 1 pW

REFRIGERATOR:
 Fresh food capacity: 362 litres
 2 chiller compartments
 Automatic defrost
 3 adjustable glass shelves
 1 fixed glass shelf
 2 fruit & vegetable compartments

FREEZER: ****
 Frozen food capacity: 107 litres
 Manual ice making facility
 1 fast freezing compartment
 Completely frost free

All codes shown are right hand hinged.
 For left hand hinges add the letter S to the end of the code,
 ie FAB50PS

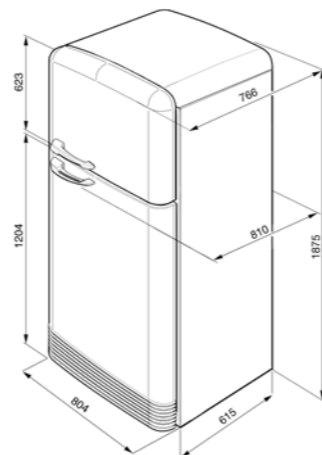

NB: These models are only available from selected
 dealers. For stockist details please see the website
www.smeguk.com.

FAB50B
White

FAB50X
Silver

When positioning these appliances adjacent to a wall
 or kitchen unit a gap of 200mm must be left to allow the
 door to open.

For additional information see pages 22-23

FAB50B

FAB32RNR

50's RETRO STYLE REFRIGERATION-FREEZER, RED

FAB32RNC Cream

FAB32RNN Black

NO FROST VERSION

Gross capacity: 328 litres
2 adjustable thermostats
Noise level: 41 dB(A) RE 1 pV

REFRIGERATOR:

Fresh food capacity: 229 litres
Automatic defrost
3 adjustable glass shelves
1 fruit and vegetable container
1 covered storage box
1 chrome wine rack

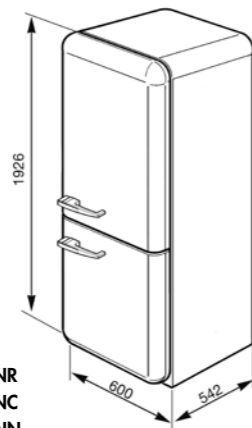

FREEZER: ****

Frozen food capacity: 75 litres
2 drawers
1 fast freezing drawer
Ice cube tray

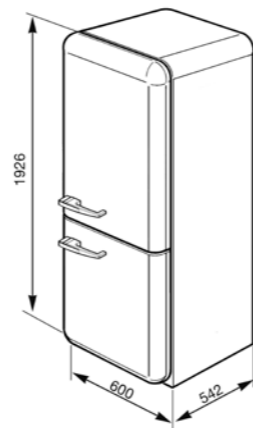

ONLY AVAILABLE IN THE FOLLOWING COLOURS:

Red FAB32RNR
Cream FAB32RNC
Black FAB32RNN

All codes shown are right hand hinged.
For left hand hinges replace R in code with L,

Climatic Class

The climatic class indicates the range of ambient temperatures for which the appliance is suitable. It is important to select a refrigeration appliance specified for the environment in which it is to be situated.

Climatic Class	Min temp (°C)	Max temp (°C)
SN	10	32
N	16	32
ST	18	38
T	18	43

SYMBOLS

The cool n fresh compartment keeps food fresher for longer.

The fast freezing function brings the temperature of the compartment down when activated a few hours prior to usage.

LED interior lighting is a more energy efficient and long lasting way of illuminating the interior of the appliance.

Excellent insulation and special devices keep noise to a minimum.

The No Frost and Frost free systems prevent ice from forming so that no defrosting is required.

The automatic defrost system works by automatically defrosting at regular intervals eradicating the need to defrost altogether.

The power saving mode allows you to disable the refrigerator and keep the freezer working.

Air plus keeps food fresher for longer.

Quality, Environmental and Occupational Health & Safety Management Systems

All Smeg factories are ISO9001, ISO14001 and OHSAS 18001 certified, ensuring that the highest standards of quality are continually maintained whilst actively responding to all environmental issues relating to manufacture. The materials and components used to produce smeg products undergo strict quality control testing, and care is taken to source recyclable materials wherever possible. These management systems enable Smeg to provide complete assurance that all products meet superior standards whilst respecting the environment. The workforce is not forgotten – the occupational health and safety assessment scheme promotes a safe and healthy working environment, aids legislative compliance and helps improve overall performance.
