

# KLF04 Temperature controlled kettle

Large 1.7 litre jug capacity with a water gauge that shows both in litres and cups!

Enamelled stainless steel surface ensures excellent heat conduction.

Removable lime scale filter situated at the pouring spout, easy to lift and clean.

BPA free plastic to ensure safety

Solid moulded base with enclosed element for easier limescale removal.

Acoustic alarm that activates when switching on/off, at the beginning of a cycle and at the end of cycle with option to silence this feature

Soft opening lid for easy filling.

Specially designed spout and balanced weight for easy pour.

7 Temperature settings from 50°C to 100°C, for the perfect infusion of herbal teas or flavour rich coffee and hot chocolate.

Cable tidy ensures minimal exposure on the work surface.

The keep warm button allows you to keep the water at the selected temperature for up to 20 minutes.

# SJF01 Slow Juicer

The slow juicer is a great partner for the kitchen, to make freshly squeezed juices anytime. The juice can be made into soups, sauces and jellies. **HOW IT WORKS:** fruit and vegetables are placed in the top of the chamber and manually pressed through the chute with a pusher. The fruit is then slowly squeezed using an auger screw, to give the same effect as a manual juicer. This effective extraction method uses Slow Squeezing Technology 'SST' to give the best results.

The juicer uses a slow 43RPM speed, to slowly squeeze the fruit and vegetables for a nutritionally rich and vibrant juice.

Transparent Tritan™ plastic juicing chamber can hold up to 450ml of juice at any one time, for more juice simply open the tap to allow the juice to flow. A BPA free scratch resistant jug with a lid is provided to catch the juice and store in the fridge.

The waste shoot allows for the fruit and vegetable pulp to be released from the juicing chamber freely. A jug is provided to place under the tap to catch all the waste.

All working parts are made from Uitem™ which is 8 x harder than other plastics, extremely hard wearing and durable.

Two juice strainers are provided. The fine strainer is perfect for juices ready to drink. The coarse strainer is good for thicker sauces and soups.

A simple reverse lever is positioned at the back of the machine to allow for a change of direction if required, to ensure the smooth running of the machine.

All the parts are easily taken apart for cleaning and brushes are provided to access all areas.

150W AC motor is strong and durable. The low speeds along with the low vibrations enhances its stability.

Cable tidy to ensure minimal exposure on the work surface.

The juice tap is fitted with a plug that fully seals juice, to avoid any unwanted spillages on the work surface.

# SMF02 Stand Mixer

Control lever situated on the top of the body with a centrally positioned opening button, allowing easy operation from any position.

Auto-switch off when the main body is raised.

10 speeds with soft start. Catering for all your mixing needs with added control.
