

**Thank you for purchasing a SMEG cooking product.**

**SMEG cookers, hobs and ovens are made from high quality stainless steel and will give you excellent service for many years.**

**Our ceramic hobs are manufactured from Schott glass, our hobs and cookers from 18:10 stainless steel.**

**To ensure that these products look their best we recommend the following cleaning materials:**

- |  |                           |
|--|---------------------------|
| • Ceramic hobs and the outside of glass oven doors | <b>Hob Brite</b>          |
| • Stainless steel pan stands and burner caps       | <b>Bar Keepers Friend</b> |
| • Stainless steel hob tops and panels              | <b>Warm soapy water</b>   |
| • Spills on hob tops or panels                     | <b>Shiny Sinks</b>        |

**Abrasive cleaners should not be used on ceramic glass or stainless steel hob tops as they will scratch.**

**Tarnish on 18:10 stainless steel pan stands is a normal reaction between this high quality metal and naked flame. It can be removed with Bar Keepers Friend and a pan scourer.**

**All of these products have been tested by SMEG UK, and when used in accordance with the manufacturer's recommendations will maintain your SMEG products in excellent condition, without causing damage to the surfaces.**
